

# BeyondID

## A TRUE OMNICHANNEL EXPERIENCE

Consolidate customer identities from various systems to create a unified customer profile across all digital channels to create personalized experiences.

## SIMPLIFY BRAND UNIFICATION

Reduce registration and transaction friction with single sign-on and social sign-on capabilities. Provide a single self-service platform for customers to manage their accounts without the need for additional resources at your call centers. Wouldn't it be nice to not have a recording that mentions your unusually high call volume for a change? We think so too.

## BUILD TRUSTED RELATIONSHIPS

When you protect your customer data, your customers notice. Trust is one of the most important factors consumers consider when choosing a brand. If you can't protect their data, they don't want you to have it. It's that simple.

## PROTECT YOUR BRAND REPUTATION

Real-time, responsive, round-the-clock security that verifies who customers are and what they can access, from login to session log out. Adaptive to context, requiring additional identity verification when risk factors are present helps keep your data and their information secure.

## Digital Identity Blueprint for Retail & Customer Loyalty

Aligning identity initiatives with your organization's strategic goals has proven to be an effective way to get out of the reactionary game of "Security Whack-a-Mole" and onto a proactive roadmap. Stay confidently ahead of threats, and create the experience your customers expect.

There's no better time than now to get started on your digital identity journey. BeyondID is an Okta Apex Partner. We've helped some of the best retail brands in the world modernize their customer data approach with digital identity strategies based on each of their unique set of goals.
