ADP Connector

## BeyondID ADP + Okta Connector

Human Resources Information Systems often function as systems of record for organizations. As a result, a high level of coordination between HR and IT is required for timely provisioning and de-provisioning of user accounts. Integrating ADP with Okta allows centralized, dynamic, and automated lifecycle management.

## BENEFITS

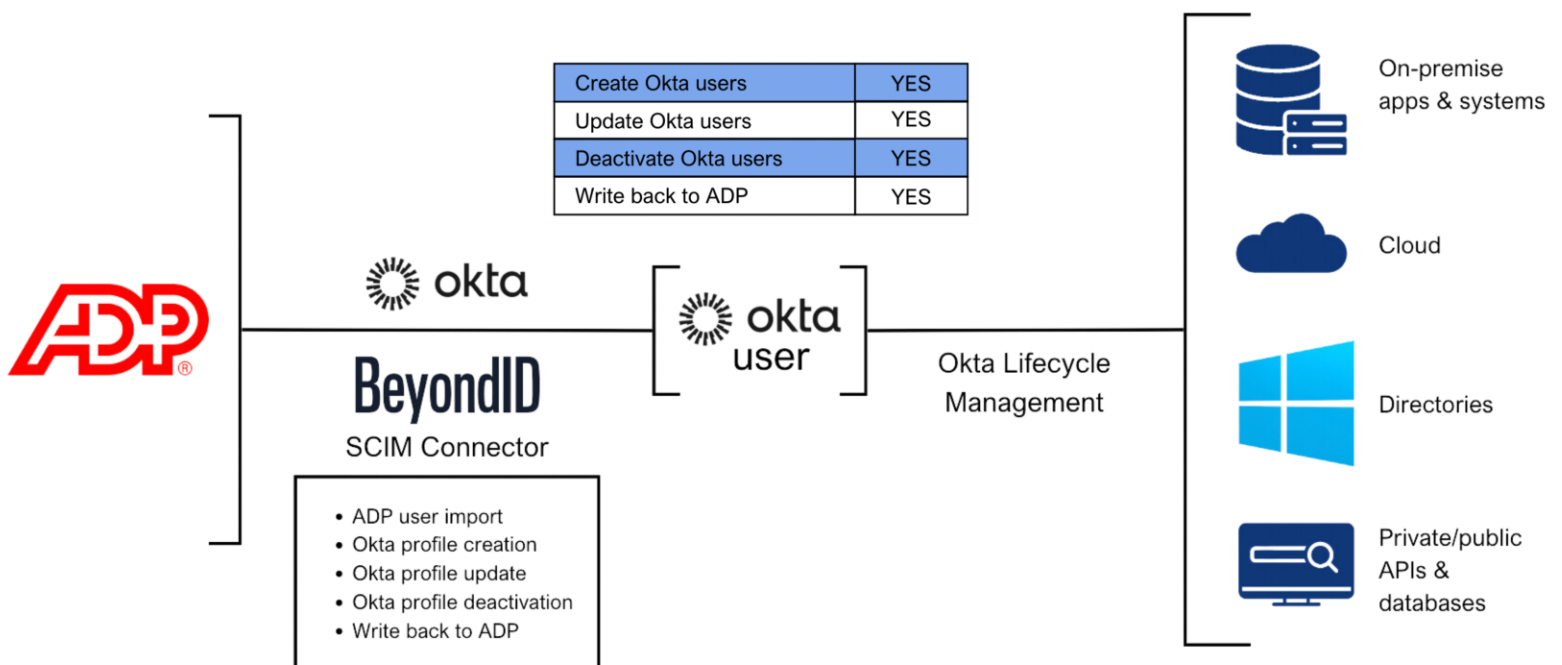

- Keep ADP as the system of record while adding Okta's best-in-class security through Universal Directory.
- Eliminate risk of manual process errors and number of rogue accounts.
- Integrate cloud services with on-premise systems.
- Facilitate frictionless management shared between HR and IT.

**Centralize Access Management** for your ADP workforce.

**Automate Processes** like user provisioning for increased productivity.

**Secure Your Organization** with customizable provisioning across all systems.

**Enable Real-Time Updates**, ensuring data freshness and fidelity.
