### TAILORED OKTA INTEGRATION BY BEYONDID

Manage your end-to-end digital banking and lending solutions with a tailored Okta Integration.

### AUTOMATIC REFLECTION IN Q2

With account sourcing set up in your IT environment, account changes in Okta or Human Resources Information System (HRIS) connected to Okta will automatically be reflected in Q2.

### AUTOMATIC CHANGES TO DOWNSTREAM APPLICATION

The integration uses Okta to automatically pass any changes made in Q2 to downstream application.

### CENTRALIZED & SECURE MANAGEMENT

Leverage Okta's centralized and secure lifecycle/user management for the Q2 digital banking system.

### SEAMLESS EXPERIENCE

Provide a seamless experience for users to access the banking information they need.

### MANAGE USERS

Manage users tied to the Q2 digital banking portal.

- > Manage identity for Q2 users and customers through centralized and secure Okta Universal Directory
- > Integrate Okta and Q2 using on-premise provisioning interface
- > Account Provision and Deprovision
- > Delegate authentication to Q2 systems
- > JIT migration of user profiles with/without password
- > Migrate users from Q2
- > Scales to customer needs

### Supported Hash Algorithms

MD5 & Custom MD5  
SHA1, SHA-256, SHA-512  
PBKDF2WithHmacSHA1  
PBKDF2WithHmacSHA256  
PBKDF2WithHmacSHA512  
BCRYPT  
Custom Hash Algorithm
