- Shopify APIs (view, create, update and get customer record)

BeyondID Shopify + Okta Connector for Customer and Lifecycle Management

The Shopify platform is a powerful way to engage customers in person and online. BeyondID's Shopify + Okta Connector allows companies to manage customer accounts in Shopify using Okta's best-in-class identity solutions. The integration enables seamless and secure lifecycle management.

By connecting to Shopify and Okta, it's possible to create effective, centralized customers. Managing their accounts and customer data from the Shopify commerce platform allows you to learn about who they are, engage them, and manage their lifecycle.

- Create, update, delete customer users in Shopify.
- Import user records into Okta.
- Sync user attributes between Shopify and Okta.
- Track and engage customers.
- Centralized user access management.
