

BeyondID

# Digital Identity Blueprint for Financial Services

Spot and stop  
fraud up front

Outsmart artificial  
intelligence threats

Simplify regulatory  
compliance

## Secure Banking Experiences

In response to the increasing demand for better and more widespread digital service offerings, the financial industry is doubling down on the Digital Banking Experience.

A *digital identity* ecosystem that connects users, devices, applications and machines across services ranging from credit card solutions to investment tools to rewards programs and more will enable you to:

- > Empower customers to take charge of their identity and data, improving brand integrity and respecting customer privacy.
- > Prevent fraud via advanced authentication, fine grained authorization and identity proofing
- > Build brand loyalty with personalized customer experiences.

### ALIGN BUSINESS, IT

Our blueprint ensures that your digital identity efforts are perfectly aligned with your broader business and IT strategies.

### IdP ASSESSMENT

We conduct a thorough assessment of your existing IdP to identify strengths, opportunities, and gaps, and recommended next steps.

### VALUE ANALYSIS

One size never fits all. We'll help you discover the value that a modern digital identity solution will bring your organization.

### YOUR PLAN DELIVERED

You will receive an actionable roadmap shows the step-by-step process with timelines, milestones to ensure success.

"Finding the right partner up front, like BeyondID, helped us navigate the minefield of obstacles in our digital banking & identity modernization journey."
