

Services Catalog

As a leading AI-powered managed identity services provider, we help today's most innovative brands simplify complex security challenges, optimize access, and accelerate growth through tailored IAM solutions. Wherever you are on your identity journey, we are here to help you accomplish your goals.

Okta x BeyondID

Not only is BeyondID an Okta Apex Partner and multi-year Delivery Partner of the Year, we employ more Okta-certified professionals than any other organization outside of Okta itself.

Last year, we joined forces with KeyDataCyber, creating one of the largest dedicated identity security partners in North America. As dual Okta Apex Partners, our combined team brings unmatched expertise, scale, and resources to help organizations accelerate zero-trust initiatives, modernize identity programs, and maximize the value of their Okta investment.

New Customer Accelerators

Okta Workforce Setup Packages

Package	Silver	Gold	Platinum
Summary	Up to 3 apps	Up to 6 apps	Up to 10 apps
Duration	Up to 3 weeks	Up to 6 weeks	Up to 11 weeks
2 Hr Workshops	6 sessions	12 sessions	22 sessions
SKUs	• SSO • LCM • AMFA/MFA • DSSO • One Directory Migration	• SSO • LCM • AMFA/MFA • DSSO • One Directory Migration	• SSO • LCM • AMFA/MFA • DSSO • One Directory Migration
Out of Scope	• O365 LCM • HRaaS • API • CIAM/Auth0 • SCIM • On-Prem • ASA/PAM • Okta Access Gateway • OIG • Okta Device Access	• O365 LCM • HRaaS • API • CIAM/Auth0 • SCIM • On-Prem • ASA/PAM • Okta Access Gateway • OIG • Okta Device Access	• HRaaS • API • CIAM/Auth0 • SCIM • On-Prem • ASA/PAM • Okta Access Gateway • OIG • Okta Device Access

Okta Auth0 Setup Packages

Package	Silver	Gold	Platinum
Summary	Up to 1 IDP and 1 App	Up to 2 IDPs and 5 Apps	Up to 3 IDPs and 8 Apps
Duration	Up to 2 weeks	Up to 4 weeks	Up to 8 weeks
2 Hr Workshops	8 sessions	16 sessions	32 sessions
SKUs	• Auth0 • SSO • MFA • Universal Login	• Auth0 • SSO • AMFA/MFA • API Authorization • Universal Login	• Auth0 • SSO • SDK Deep Dives • AMFA/MFA • DSSO • Universal Login
Out of Scope	• Custom Universal Code • Early Access Features • OIDC/SAML • Adaptive MFA • Change Management • Okta Access Gateway • FIDO/WebAuthN	• Custom Universal Code • Early Access Features • OIDC/SAML • API Integration • Change Management • Okta Access Gateway • FIDO/WebAuthN	• Custom Universal Code • Early Access Features • OIDC/SAML • Change Management • Okta Access Gateway

Identity Governance

BeyondID provides implementation services for Okta's newest product, Okta Identity Governance (OIG). Okta Identity Governance products help customers with their governance, risk, and compliance requirements to simplify access fulfillment and entitlement tasks throughout the identity lifecycle.

Why BeyondID

As the premier Okta partner in North America, BeyondID bridges the gap between security policy and technical execution with the most joint solutions in the Okta partner ecosystem.

Year

Secure Your AI Evolution

We provide advisory and consulting services to help discover, assess, and secure AI agents within the current environment by defining an identity-first AI security strategy, architecture, and operating model. Our comprehensive approach ensures your transition to an AI-driven enterprise is safe, compliant, and resilient.

Benefits

- **Total Visibility:** We discover and inventory every AI agent in your environment—from autonomous systems and copilots to RPA workflows and third-party integrations.
- **Identity-First Security:** By applying Zero Trust and least-privilege principles, we ensure every AI agent has a verified identity and clearly defined permissions managed through your central IAM.
- **Enforced Control:** We implement a robust security framework using Model Context Protocol (MCP) to act as a traffic control layer, monitoring and securing every interaction between agents and LLMs.
- **Unified Governance:** From lifecycle management to incident response, we build the operating models and policies you need to manage AI risk at scale.
- **A Clear Path Forward:** Receive a customized AI security adoption roadmap designed to guide your team through a seamless and secure implementation.

Deliverables

- AI Agent Inventory & Risk Classification
- Reference AI agent security architecture integrating IAM, MCP servers, LLMs, and enterprise systems
- AI Agent Governance, Risk & Operating Model
- AI Agent Security Adoption Roadmap

Winning the Agentic Enterprise: BeyondID's Identity-First AI Playbook for Okta

The Identity Crisis Every Okta Customer Must Solve Now

AI is creating an identity crisis — BeyondID delivers the full platform answer.

- **AI Agents = Unmanaged Identities:** AI agents lack lifecycle and governance, creating new identity risk. BeyondID's blueprint secures and governs them with Okta.
- **Platform Wins Deals:** Customers need a full identity stack for a unified security fabric. BeyondID delivers across every layer with unmatched Okta expertise.
- **Regulated Industries Can't Wait:** Healthcare, FinServ, Telco, and Govt. require fast, compliant deployments. Pre-built frameworks (Epic, Q2, SAP, Workday Student) accelerate time to value.

Full Okta Platform Coverage

The key Okta partner delivering the complete Identity Security Fabric — AI agents through 24x7 managed operations.

AI Agent Identity & Security: Discover & govern all NHIs, copilots & RPA bots. Agent-to-LLM/API AuthN/AuthZ via MCP. Zero Trust AI architecture: Auth0 + Okta + OCI. 2-12 wks. to production-ready.

Workforce Identity (WIC): SSO, MFA, FastPass passwordless, Lifecycle Mgmt. Legacy IdP migration: ADFS, OneLogin, Ping, SailPoint. Zero Trust / ZTNA integration.

Customer Identity (Auth0 / OCI): 1 of 3 globally authorized to deliver Auth0. Passwordless, social login, FGA for multi-tenant apps. Epic, Q2, Shopify, SAP, Workday Student connectors.

Identity Governance (OIG): OIG implementation, access certification, entitlement management, SoD enforcement, migration from SailPoint / Saviynt.

Privileged Access (OPA): Just-in-time privileged access management. NHI privileged access governance for AI agents. Secrets management for automated pipelines.

Threat Detection (ITDR + 24x7 Mgd): Real-time identity threat detection. 24x7 Managed Identity Operations (L1-L3 SOC). Continuous ISPM monitoring and AI-powered anomaly detection

4 Integrated Go-To-Market Offerings

AI Identity Readiness Sprint (Days): Rapid assessment of AI use cases, identity risk, governance model, and a 30-90-day execution roadmap.

30-90 Day Secure Agent Launch: Production AI agents with embedded identity architecture, access controls, secrets management, and compliance validation.

Enterprise AI Platform Hardening: Secure deployment of Claude, Copilot, Gemini, and OpenAI with shadow AI detection, privilege controls, and data governance.

AI Operations + Identity Monitoring: Continuous monitoring of AI models, identity risk, access recertification, and governance optimization

Our Solution

BeyondID's AI Agent Identity & Security Blueprint operationalizes Okta Secures AI by helping organizations discover, classify, and govern AI agents using an identity-first, Zero Trust approach, built directly on Okta.

This is not theoretical advisory. It is an implementation-ready blueprint that enables secure AI adoption at enterprise scale.

What the Blueprint Delivers

- **AI Agent Discovery & Inventory:** Identify AI agents across the environment, including copilots, autonomous agents, RPA workflows, and third-party AI integrations.
- **Risk & Privilege Classification:** Classify AI agents by autonomy, access level, and blast radius to establish a security baseline.
- **Identity-First AI Security Architecture:** Establish Okta as the central identity and authorization authority for AI agents and non-human identities.
- **Zero Trust Enforcement Model:** Define secure authentication and authorization patterns for: Agent-to-LLM, Agent-to-API and Agent-to-agent interactions
- **MCP-Centric Control Layer:** Design an MCP-based enforcement and traXic control architecture for all LLM interactions.
- **Governance & Operating Model:** Define ownership, lifecycle management, policy enforcement, and incident response for AI agents.
- **AI Security Adoption Roadmap:** A prioritized, board-ready roadmap to guide secure AI implementation at scale.

Business Outcomes

- Secure AI adoption without slowing innovation
- Reduced AI security and compliance risk
- Clear visibility into AI agent behavior and privilege
- Elimination of future AI security debt
- Board-ready insights and actionable next steps

How We Deliver

- Up to 12 structured working sessions with security, identity, and AI stakeholders
- Duration: 6-8 weeks
- Delivered by BeyondID's Okta-certified identity and security experts

Digital identity Blueprint

Powered by Identity Command Center (ICC)

Discovery

Step One

Conduct various discovery sessions with key IAM stakeholders & leads

Step Two

Understand identity program goals and business drivers

Step Three

Determine existing challenges and gaps based on current capabilities and planned initiatives

Business Assessment

Step One

Analyze current processes, architecture and capabilities across various IAM functions and business impact (including security, risk, compliance, and user experience)

Step Two

Evaluate and determine Identity Program maturity state against Identity-First Zero Trust Maturity Model

Step Three

Define key use cases capabilities and recommendations that align with enterprise business goals

Program Blueprint

Step One

Define a phased approach to enhance IAM program definition and service delivery to the business

Step Two

Propose initiatives to improve overall security posture and drive business focused outcomes

Step Three

Develop program structure including key metrics to evaluate program success (ROI/KPIs)

Existing Customer Services

Okta FastPass Packages

Package	Silver	Gold	Platinum
Duration	2-3 weeks	4-6 weeks	8-10 weeks
2 Hr Workshops	6 sessions	12 sessions	25 sessions
In Scope	- Controlled pilot 100 users - Single IdP - Project kickoff - Solution design (SDD) 6 working sessions - Initial policies	- Phased rollout 1,000 users - MDM integration - Communication documents 12 working sessions - Early adopter support - Phased policies	- Enterprise rollout 10,000 users - Risk-aware access - End-user videos 25 working sessions - Persona testing - Full execution
Out of Scope	- Enterprise-wide FastPass rollout - Advanced authentication - Integration with MDM solution - Ongoing operational support	- End-user training - Non-native integration with MDM platform - Advanced Zero Trust - Custom automation - Post-production managed services	- Non-native integration with MDM platform - Custom automation - Post-production managed services

Identity Engine Upgrade

Okta Identity Engine allows organizations to customize their Okta cloud components and satisfy an unlimited number of identity use cases. Instead of relying on predefined behavior for identification, authorization, and enrollment, Okta Identity Engine offers customizable building blocks to support dynamic, app-based user journeys.

Why BeyondID

As Okta's #1 APEX Partner, we don't just move you from point A to point B. We optimize your entire identity posture.

- **The Deepest Bench in North America:** Access the largest team of Okta-certified consultants and architects outside of Okta itself.
- **Proven Migration Framework:** Our proprietary methodology ensures zero user disruption and 100% data integrity.
- **Battle-Tested Experience:** Having completed hundreds of OIE migrations, we've solved the "edge cases" before they become your problems.

Advantages of Okta Identity Engine

Passwordless Future: Deploy Okta FastPass for a frictionless, phishing-resistant login experience.

App-Level Policies: Granular control over individual applications based on device posture and risk.

Improved User Journeys: Enhanced "Sign-In Widget" capabilities for a more modern, branded experience.

Advanced Device Trust: Seamless integration with your endpoint management (MDM) solutions.

Okta Tenant Health Check

Our Okta Tenant Health Check is a 1-week assessment outlining the current state and providing recommendations for optimizing the Okta tenant.

Our Okta Health Check Service is designed to provide you with an actionable overview of the state of your Okta platform.

Drawing from our decades of experience and our 10+ years of specialized Okta expertise, our identity experts will:

01

Guide you through the identity assessment to define current state and requirements

02

Set priorities to maximize business value

03

Define your organizational use cases, scope, resources, and estimates

04

Build a proposal detailing the most efficient prioritization of modern identity capabilities to meet business needs

05

Deliver an in-depth assessment report summarizing our findings, including a gap analysis and roadmap

- Executive Summary
- Scope and Activities
- Plan & Timeline
- Resources & Cost Estimate

SMS Gateway for okta

BeyondID offers BYOT services and solutions for to make the most of Okta's workforce and customer identity solutions. Whether you simply need professional services to help get you going, or a full managed solution that includes licensing and support, BeyondID is here to help.

BeyondID's SMS Gateway, powered by Vonage is currently offered in three tiers to best meet the needs of today's customer.

SMS Gateway Tiers

SMS Gateway		SMS API/Managed Service	
For All Organizations		For Workforce	For Consumer
An all-in-one solution managed and supported by BeyondID, perfect for SMB and Mid-Size organizations. This is the best option for those customers who need to bring their own provider, but do not have the time nor resources to manage additional authentication methods within their current platform.		This managed service is intended for international enterprise organizations with the need for higher volume and localized telephone numbers, hosted on AWS. 	Custom managed service based on your customer volume, daily average users, session details and load balancing requirements.

Packaged Solutions

Connectors Across Industries

To harness the full potential of your enterprise software, you need seamless integration with your other critical systems. Our connectors simplify these complex integration processes, reducing manual efforts and streamlining operations.

Looking for an connector to a tool that isn't listed here? Not to worry. Our teams specialize in custom integrations and technology acclerators for seamless security across applications.

Secure Digital Banking for Banks & Credit Unions

See Our Demos

Powered by Okta Customer Identity Cloud (Auth0) and extended by BeyondID, a KeyData Cyber family company, this solution combines secure logins, frictionless onboarding, self-service recovery, and adaptive fraud protection; all in one place.

Account Access

Passwordless, biometric, or passkey login, out-of-band MFA, and AI-powered "step-up" authentication for high-value actions.

Account Recovery

One-time passcodes and reset links, verified account unlock flows, and low-friction username retrieval.

Profiles & Transfers

Secure profile updates, risk-based authentication for funds movement, and secure transfers across accounts and institutions.

Smart Identity, Seamlessly Packaged.

Dynamic Login Journeys

- Tailored prompts & extra security based on context

Customizable Branding

- Seamless, on-brand login and registration

Real-Time Notifications

- Instant account activity alerts to build trust

Consent Management

- Simple tools for customer data/privacy control

Centralized Identity Management

- One source of truth across the ecosystem

Compliance-Ready Security

- Contextual MFA, anomaly detection, audit trails

Secure Patient Experiences for Healthcare

Simplify and secure care with patient-first, persona-focused identity and access management solutions. Our proven end-to-end IAM services protect what matters most: your patients, your reputation, and your ability to deliver care.

BeyondID
a KeyDataCyber Company

24x7 Identity Support

Outsource administration and optimization to free up your IT team for more strategic initiatives. We proactively monitor and manage your environment — resolving errors, updating accounts, and proactively addressing needs.

- Dedicated expertise for service enhancements
- Compliance and risk reporting
- AI-led optimization and maintenance
- Change impact analysis
- Adoption monitoring
- Ongoing improvement strategies

BeyondID's Service Management Packages

BeyondID's service management offering delivers essential IAM operational support to help organizations maintain stable, secure identity services with minimal internal overhead. It is designed for teams new to Okta and/or Auth0 or with limited resources, providing reliable business-hours coverage, visibility, and efficient issue resolution.

Service Management Package Tiers

Okta Auth0 Service Management - Silver

- 8x5 Support via BeyondID SOC and Identity Command Center (ICC)
- Self-service reporting & analytics using BID portal
- Basic implementation of IAM policies and access controls
- Incident response and ticket handling for common IAM issues
- Administration support: password reset, MFA config, SSO, and lifecycle events

Okta Auth0 Service Management - Gold

Everything in Silver plus:

- Weekly reporting and analytics with insights into usage, risk, and policy violations
- Level 2/3 helpdesk support for complex user access and authentication failures
- Technical implementation for IAM infrastructure (e.g., provisioning, sync, MFA policies)
- Breach mitigation support: credential stuffing, privilege escalation, suspicious behavior, etc.
- 24/7 Monitoring for 1 production environment + 1 Sandbox included.

Okta Auth0 Service Management - Platinum

Everything in Silver & Gold plus:

- Architecture roadmap & design consultation for identity modernization and Zero Trust
- Support for complex environments: multi-org, dev/test/prod, M&A integration Advanced IAM configurations: ABAC, Conditional Access, federated SSO
- Ongoing governance, documentation, and change/release management

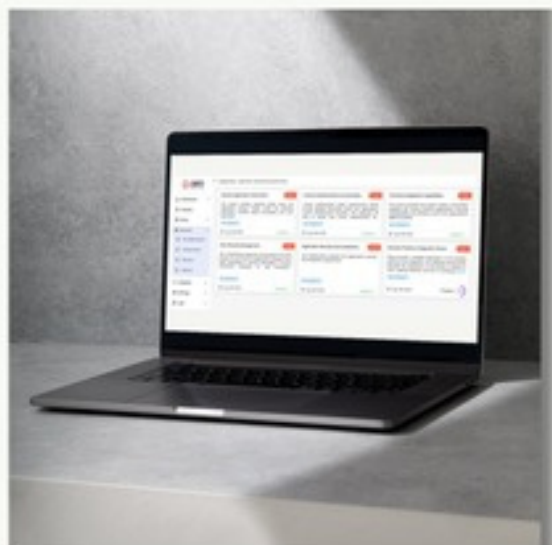

Identity Command Center

Request a Demo

The Identity Command Center (ICC) is our proprietary customer platform for managing identity maturity from the very first assessment to scaled transformation. Beginning with your Digital Identity Blueprint, ICC tracks your journey through advisory, implementation, and management, giving you a continuous, bird's-eye view of progress, risks, and opportunities.

It's your live report of where you've been, where you are, and where you can go next; designed to help identity leaders prove value, prioritize action, and accelerate outcomes.

Your Entire Identity Journey Behind a Single Pane of Glass

Proof of Progress: Translate technical milestones into measurable results you can bring to the boardroom.

Real-time Visibility: See the health of your identity program as it evolves, including live reporting from your VSOC.

Clarity on What's Next: Surface risks, rank urgency, and map them against budgets and strategic priorities.

More than Metrics. Momentum

Discover. Protect. Govern. Every AI Agent.

AI agents are becoming digital coworkers - accessing applications, APIs, enterprise data, and business workflows on behalf of employees and customers.
Before AI can be trusted, your organization needs clear answers to three foundational questions.

Where are your agents?

Inventory custom agents, SaaS copilots, automation tools, and shadow AI across the enterprise.

What can they connect to?

Map access to applications, APIs, MCP servers, service accounts, secrets, cloud, and business data.

What can they actually do?

Set ownership, lifecycle, approvals, reviews, logging, compliance, and operational controls.

Workshop Agenda | 3-4 hours

- 1 **DISCOVER**
Locate your AI agents
AI initiatives and use cases · Agent workflows · Shadow AI · Machine identities · Business ownership
- 2 **PROTECT**
Map connections and access
Applications, APIs, MCP servers, data platforms · Service accounts · Secrets · Cloud infrastructure
- 3 **GOVERN**
Define controls and ownership
Lifecycle and ownership · Requests and approvals · Certifications · Audit logging · Compliance
- 4 **ROADMAP**
Prioritize the path forward
Target architecture · Quick wins · A phased roadmap to scale AI securely

Deliverables | One Week

- ✓ **EXECUTIVE SUMMARY**
Business observations and strategic recommendations.
- ✓ **READINESS SNAPSHOT**
Maturity, identity readiness, and priority opportunities.
- ✓ **AI DISCOVERY REPORT**
Inventory, ownership, shadow AI, and governance.
- ✓ **IDENTITY & GOVERNANCE**
Capabilities, risks, gaps, and recommended improvements.
- ✓ **TARGET ARCHITECTURE**
Identity-first reference architecture and phased plan.

Book your no-pitch, hands-on alignment session across business, risk, architecture, and operating model with clear decisions and a practical path forward.
